

**Deccan Education Society's  
Fergusson College (Autonomous), Pune**

**M.Sc. Computer Science- II, SEM-III  
CSC5302 MEAN Stack**

**Practice Examples:**

1. Create an angularjs application with use of expression and other directives.  
For example the Output screen may look like:

Some Text in inputbox :

Name:

You wrote: Concretepage

2. Create an Angularjs application with the use of ng-init directive and expression. For example the Output screen may look like:

**Price Calculator**

Quantity:

Price:

**Total in rupees: 25**

3. Create an Angularjs application which will allow the user to enter the first name, last name, date of birth and mobile number. Also display this information on the same page. (Use ng-controller).
